

ANTOINE DAVIS

GENERAL ENGINEER

Federal Infrastructure & Facilities Engineering

Carrollton, VA

757-724-1234 | adavis.bset@gmail.com

U.S. Citizen | Veteran | Active Secret Clearance

Results driven General Engineer with experience supporting Department of Defense construction, infrastructure, and facilities improvement programs valued at over \$2.5B. Skilled in project planning, contractor oversight, engineering design review, budgeting, ArcGIS mapping, and federal facilities compliance.

Proven ability to manage multi phase projects, coordinate cross functional stakeholders, and support mission critical operations across 54 engineering projects utilizing AutoCAD, Microsoft Project, SharePoint, and ArcGIS.

CORE COMPETENCIES

Federal Facilities Engineering | Construction Project Oversight | Infrastructure Improvement Projects | Engineering Design Review | Contractor Coordination | Infrastructure Modernization | Facilities Compliance | Project Lifecycle Management | Utility Systems Support | AutoCAD | ArcGIS | Microsoft Project | SharePoint | Budget Planning & Execution | Blueprint & Schematic Interpretation | Construction Coordination | Inspection Readiness | DoD Engineering Support

PROFESSIONAL EXPERIENCE

GENERAL ENGINEER

Department of the Air Force – 733 CES | Fort Eustis, VA | May 2023 – Present

- Managed engineering coordination and project execution activities for 54 federal construction and infrastructure initiatives valued at approximately \$2.5B.
- Managed multi phase renovation, utility, and facility improvement projects while ensuring compliance with engineering specifications, schedules, and federal standards.
- Utilized AutoCAD, ArcGIS, SharePoint, and Microsoft Project to support execution and tracking of large scale infrastructure modernization initiatives across DoD facilities.
- Conducted engineering analysis, design review, and project assessments to support infrastructure modernization initiatives.
- Supported contractor surveillance activities resulting in six successfully passed project inspections.
- Led coordination efforts between contractors, engineers, and stakeholders to support successful execution of federal infrastructure and facility improvement projects.

ELECTRICAL ENGINEER

Marine Systems Corporation | Fort Monroe, VA | March 2022 – May 2023

- Developed cradle to grave engineering drawings utilizing AutoCAD for infrastructure and engineering support projects.
 - Collaborated with RF systems, radar systems, and communications engineers to support technical solution development.
 - Supported engineering inspections, design modifications, and project documentation efforts across multiple simultaneous projects.
 - Performed technical analysis and equipment evaluations to support engineering feasibility and operational performance.
 - Coordinated engineering deliverables while maintaining project timelines and quality standards.
-

ENGINEERING MAINTENANCE TECHNICIAN II

Amazon | Richmond, VA | January 2021 – October 2021

- Supported electrical and mechanical systems maintenance operations within a high volume distribution environment.
 - Interpreted technical drawings and collaborated with engineering teams to support operational improvements.
-

HOSPITAL CORPSMAN

United States Navy | November 2005 – January 2021

- Maintained and calibrated biomedical and electronic equipment supporting operational readiness.
 - Conducted inspections, troubleshooting, and repair activities in high pressure operational environments.
 - Managed maintenance documentation, inventory accountability, and compliance records.
 - Supported mission critical medical operations while coordinating across multidisciplinary teams.
-

EDUCATION

Master of Science in Electrical Engineering (In Progress)

Old Dominion University

Bachelor of Science in Electrical & Electronics Engineering Technology

ECPI University

TECHNICAL SKILLS

AutoCAD | ArcGIS | Microsoft Project | SharePoint | Blueprint Interpretation | Technical Documentation | Infrastructure Planning | Construction Coordination | Data Analysis | Engineering Project Tracking
